REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the claims are allowable over the prior art of record because the prior art fails to show or suggest, either singly or in combination thereof, a child seat having a back support portion thereon, the back support portion has front and rear sides opposite to each other, and a belt receiving opening extending from the front side through the rear side. Right and left anchored members are secured on the rear side and outboard to the belt receiving opening in a longitudinal direction transverse to the upright direction. Each of the right and left anchored members has a plurality of positioning units displaced from one another in the upright direction. A belt support member is disposed rearwardly of the back support portion, and is movable relative to the right and left anchored members in the upright direction. Right and left locking members are disposed to be movable relative to the belt guiding opening in the longitudinal direction. Each of the right and left locking members has a key end and a positioning end which is opposite to the key end in the longitudinal direction and which is movable relative to a respective one of the right and left anchored members between a locking position and an unlocking position so as to permit movement of the belt support member relative to the right and left anchored members in the upright direction. An actuator is disposed to be movable relative to the belt support member and relative to the key ends of the right and left locking members in a transverse direction relative to the longitudinal direction between first and second

positions. A coupling member is disposed to couple the actuator to the key ends of the right and left locking members such that, when the actuator is moved from the first position to the second position, the positioning ends of the right and left locking members move simultaneously from the locking position to the unlocking position so as to permit movement of the belt support member in the upright direction relative to the right and left anchored members.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
